WORK EXPERIENCE

Pirum Systems, NY | Solutions Engineer

June 2024 | Present

- Cultivated a high-performing US client servicing team of 5 employees through dedicated mentorship and training initiatives, resulting in better US hours support and a reduction in new hire onboarding time.
- Managed end to end setup onto the Pirum platform for dozens of new and existing clients from both a technical and business perspective gaining a well-rounded understanding of the securities lending business
- Enhanced automated processes to improve workflow, productivity, reliability, and monitoring across client onboarding and client support
- Developed standardized JSON schema to ingest data into platform improving data integrity and efficiency, reducing onboarding time by 25%
- Implemented solution to match \$20m worth of income claims to correct relationships for large lender improving their claims automation

Pirum Systems, NY | Application Support

February 2022 | May 2024

- Provided US technical support handling a midday handover from London team, quickly resolving external client issues, supporting internal/external users across entire product suite for both the cloud and on-prem services
- Led dozens of incidents calls to resolution under occasional stressful scenarios gathering the correct people and teams to resolve issues in a timely fashion
- Managed opsgenie alerting for US hours reducing the number of false alerts by 25% reducing out of hours callouts
- Documented methods for debugging common issues, liaising with product and development teams to resolve recurring issues
- Enhanced Pirum's security posture analyzing IP addresses used across our firewalls internally/externally
- Improved uptime of mail server by removing outdated logging process spamming the mail queue
- Assisted with platform and application enhancements to reduce bottlenecks on servers, adding memory or drive space where needed, provisioning new servers, load balancing databases, optimizing SQL queries, updating grafana dashboards, improving application logging
